TUXCLAD

DECORATIVE AND THERMAL EXTERIOR CLADDING

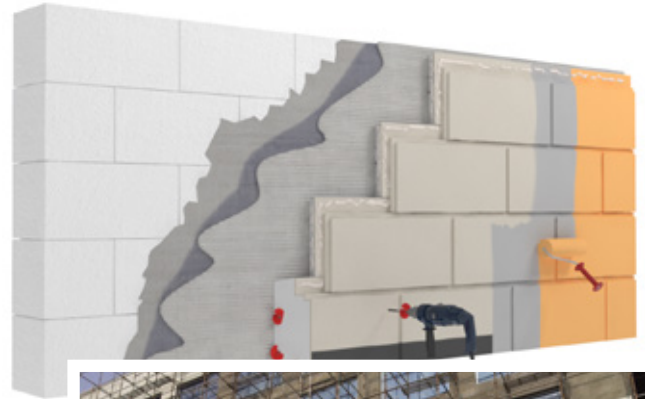

Perfect for new buildings, Renovations and Thermal insulating projects.

The system is recommended for new construction and renovations where facade aesthetics with high quality thermal insulation at an acceptable price is a target.

The TUXCLAD product range is intended for external decorative thermal insulation and finishing of wall constructions with the highest demands decoration and insulation efficiency.

The increased thermal resistance leads to an immediate significant reduction in costs and the investment return on thermal insulation is fast.

Ideal usage for low-energy and passive houses and everywhere where there is need to achieve the maximum best aesthetics, fastest installation time and thermal insulation.

BEFORE RENOVATION

AFTER RENOVATION

BENEFITS

QUICK APPLICATION:

Much faster to apply than traditional cladding (with plaster and paint) application.

CLEAN APPLICATION:

It is much cleaner to apply compared to traditional plaster rendering. (It has an important advantage especially in renovation projects because it prevents soiling of the shutters or the air conditioning systems with plasters).

LOW LABOR COST:

Cost of labor is lower compared to the traditional methods.

HIGH INSULATION QUALITY:

TUXCLAD Decorative Insulation System are produced from EPS with density of 24 -30 kg/m³. It has higher insulation value than EPS of 16kg/m³ density used in traditional external thermal insulation.

SMOOTH SURFACE:

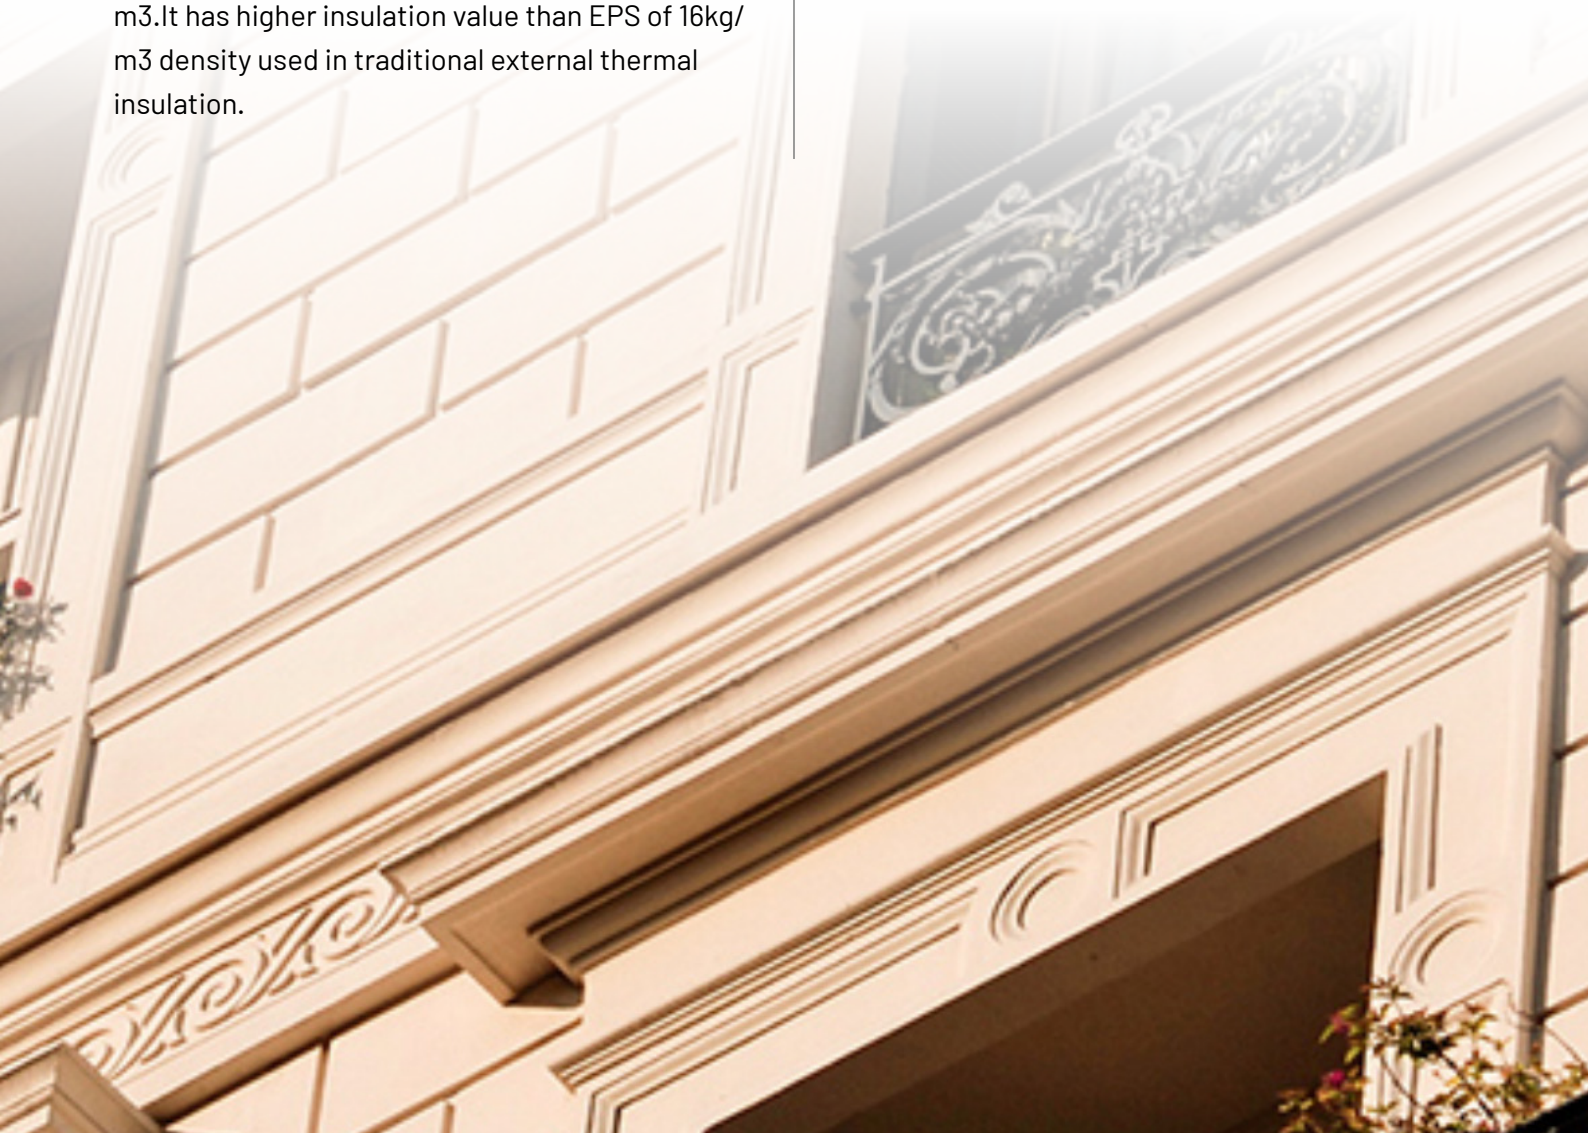

The materials which are coated (plastered) at plant conditions provides a smoother finishing than traditional rendering applications. Plastering and trowel marks are not evident when sun hits the facade from the side as it is with traditional external system.

DECORATIVE APPEARANCE:

The boards which can be processed in a variety of forms allow for unlimited architectural design. The external TUXCLAD facade can have a wooden, Terra Cotta, Ceramic, Facing Brick appearance.

MINIMUM APPLICATION FLAWS:

The easy to apply fabricated products minimize labour error.

No More plain walls. The prefabricated Cladding offers a minimalistic and irresistible touch to modern buildings.

CLAD 1 - The Modern Groove

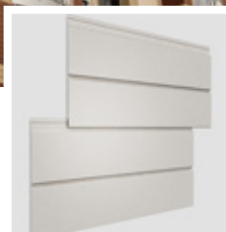

CLAD 2 - The Modern Groove

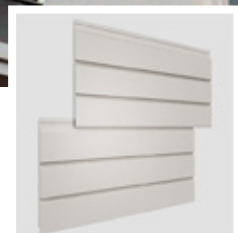

The Classical groove styled cladding features all traditional designs and offers vast possibilities to thermally insulate and renovate old buildings or to give classical appearance to the walls of new construction.

CLAD 3 - The Classical Groove

CLAD 4 - The Classical Groove

CLAD 5 - The Classical Groove

CLAD 8 - Standard Siding

CLAD 8 & 9 recreate the traditional siding effects, solving such problems sound insulation, noise absorption and delamination. No more problems associated with the plastic and metal siding. Additionally we can offer custom shapes of siding according to needed design.

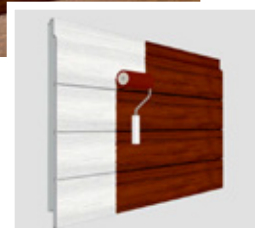

CLAD 10 - American Siding

CLAD 18Y - Wood Lamellas

CLAD 18Y & 19 recreate wood design, when speed of application and thermal insulation are at priority. CLAD 19 comes in a wide single cladding, incorporating 4 wood-like lamellas, whereas CLAD 18Y comes in single lamellas, to get the true feel of wood on any exterior wall.

CLAD 19 - Faux Wood Cladding

The unique CLAD 12 gives to any façade a splendid touch, when renovating a building or covering new walls. Besides being a thermal efficient cladding, the CLAD 12 also offer highest level of mechanical resistance to impact.

CLAD 12 - The Unique Faux Stone

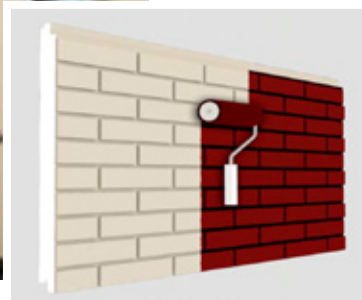

CLAD 14 is the best solution when the cost, speed of application, thermal insulation and light weight are must. It can be painted using BAUCOLOR to get the feel of the most facade cut stones.

CLAD 13 - River Stone

CLAD 16 is the most traditional facade brick that comes with preinstalled thermal insulation of the wall. However we offer several variations of specific model to fit various architectural styles. Easy and fast to apply. Tremendous results.

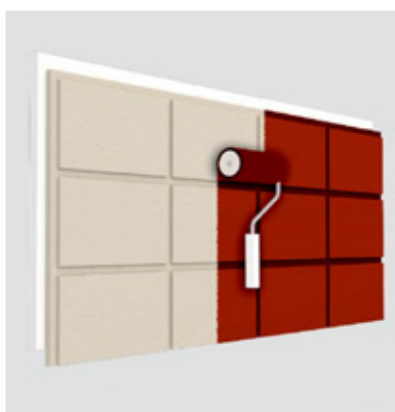

CLAD 16

CLAD 21 - Exclusive Wood Cladding

CLAD 14Y - Rough Plaster looking Cladding

CLAD 15 - Terracota look alike Cladding

CLAD 17 - Random Tile Pattern

TUXTRIM

EXTERIOR DECORATIVE MOULDINGS

ABOUT TUXTRIM MOULDINGS

Tuxstyle Mouldings are specially crafted decorative exterior mouldings meant to beautify the exterior part of the building while rendering maximum durability.

By using TUXTRIM, a product of the BAUGRUP® brand, Clients will be avoiding the problem associated with products produced from the conventional Cementitious or synthetic renders, such as surface cracking, detaching, and colour fading.

Tuxtrim is durable, practical and allows the flexibility to produce the most demanding design, whether flat or curved, concave or convex.

TUXTRIM MOULDING FEATURE

- Flexible External decorative Surface
- Strong and Hard
- Resistant to Impact
- Durable even in extreme weather conditions
- Low water absorption
- Resistant to temperature and Humidity variations
- Excellent adhesion
- Easy and Fast application of the architectural shapes
- Can be painted directly on top
- Perfect for most kind of architectural shapes
- Whiteness of coating allows easy application of bright colours
